

DESCRIPTION OF OPTION:

This option changes the operation of the P-CODE. If a P-CODE is programmed that is other than 0000 (Example 1234), and you enter 0000 for the P-CODE number, you will only be able to program limits setpoints for Limits 1 through 5. If you enter the correct P-CODE, you will be able to program all of the parameters.

PROGRAMMING ADDITIONS AND CHANGES:

There are no programming additions or changes with this option.

HARDWARE CONNECTIONS:

There are no additional Hardware Connections needed with this option.

MODEL NUMBER AND CHECKSUM:

PRESS	DISPLAY	COMMENTS
[PROGRAM]	"PROGRAM x"	x = Number of running program.
[NEXT]	"IPLC1-K2-A"	Model and Revision Number.
[NEXT]	"EPROM 3A75"	Checksum of Software.
