H25-SE-R1A, H25-SE-R2A, & H25-SE-R3A

SHEET # 940-2T611

DESCRIPTION

The H25-SE-R1A, H25-SE-R2A, and H25-SE-R3A are AMCI size 25, servo mount, single turn transducers with end connectors that are mechanical and electrical replacements for Allen-Bradley's 846-SJHA1CG-R1, 846-SJHA1CG-R2, and 846-SJHA1CG-R3 Industrial Resolvers. Physically identical, the only difference is the resolver embedded in the transducer. Their IP64 rating means they will survive most industrial applications including washdowns.

Several variations of this package, that do not have Allen-Bradley equivalents, are available as special orders. The first option is a shaft seal that raises the environmental rating from IP64 to IP67. The other options are three different shaft sizes, including 1/4 inch, 10 mm, and 3/8 inch with a 3mm keyway. For additional information on these options, contact the factory through our general sales e-mail account; sales@amci.com, or directly at (860) 585-1254 from 8AM to 5PM EST, Monday through Friday.
